

European Network for Community-Led  
Initiatives on Climate Change and Sustainability

Isn't it time to work closer  
**together**  
to support grassroots local  
action for significant  
**change?**

## Who are we?

**ECOLISE** is a coalition of organisations engaged in promoting and supporting local communities across Europe in their efforts to build pathways to a sustainable future. The members of **ECOLISE** include international, national and sometimes regional networks of community-based initiatives, as well as other bodies engaged in European-level research, training, communications or other activities to support community-based action on climate change and sustainability. By bringing these organisations together, **ECOLISE** seeks to establish a common Europe-wide agenda and a platform for collective action.

## ECOLISE member organisations/groups

- Transition Network and Transition UK
- Transition Research Network
- Transition Germany
- Transition France
- Transition Ireland and Northern Ireland
- Transition Spain
- Transition Netherlands
- Transition Italy
- Transition Sweden
- Lisbon University, Portugal

# Working towards a Europe of dynamic, resilient communities with a net zero carbon footprint.

ECOLISE's vision is of a Europe where the members of every local community have taken a lead role in ensuring local economic, social and environmental sustainability. Through their actions, they have achieved a net zero carbon footprint and in so doing have made a major contribution to the establishment of a post-carbon, ecological society in Europe.

To support its member organisations in achieving this vision, the mission of ECOLISE is **to be a shared platform for learning, action and advocacy of community-based initiatives on climate change and sustainability in Europe.**

Through its activities, ECOLISE seeks to raise the profile of community-based action on climate change and sustainability in Europe, to facilitate exchange, cooperation and knowledge development and sharing among stakeholders across Europe, and to strengthen the collective influence of its members in EU policy making.

**ECOLISE draws on experiences from other parts of the world and, where possible, seeks to be a source of inspiration and support for similar initiatives outside of Europe.**
